Report on Group Discussion Session on Climate change
Held on 22.02.2021

Date of Event	22.02.2021
Name and Type of Event	An Interactive Group Discussion Session On Climate Change- What Can Be Done About It ?
Conducted by	Ms. Harshita Gupta
No. Of Participant	30

An Interactive Group Discussion session was conducted for Semester IV students of Section A and B with regard to the active Involvement of the class on the topic of Climate Change and the solution as what can be done about it .Students came up with the solutions and discussed about the various approaches such as changing our main energy source as to Renewable sources of Energy ,Suitable transportation ,Air pollution Prevention ,Waste Management Recycling ,Air quality preservation etc. It was a matter of small effort and consciousness which were showed by the students towards Mother Earth .Similarly they even discussed few ideas and practices which they usually use at their Home with regard to the Minimising of Energy and Waste. India holds the dual distinction of being a victim as well as a contributor to climate change. It is the fourth largest carbon emitter, although its per capita emissions remain one of the lowest among emerging economies like China, Brazil and Mexico. Despite a huge development deficit, the world's second most populous country faces immense pressure globally to change its emission trajectory. Besides, it is one of the most vulnerable countries owing to its geography and high economic dependence on climate sensitive sectors such as agriculture, fisheries, forestry and even electricity generation. For instance, 58 per cent Indians rely solely on agriculture. Hence, any change in rain or temperature affects not only the country's food security and but also its economy.

Adaptation and disaster resilience have become very important [in the wake of climate change]...We are preparing our policies with a structured exercise [along with] a great alliance of 130 directors and departments," said Prakash Javadekar, Minister of Environment, Forest and Climate Change. He was addressing a civil society gathering, recently at an INDC consultation organised by Climate Action Network South Asia (CANSA) and the Alliance for Adaptation and Disaster Risk Reduction (AADRR).

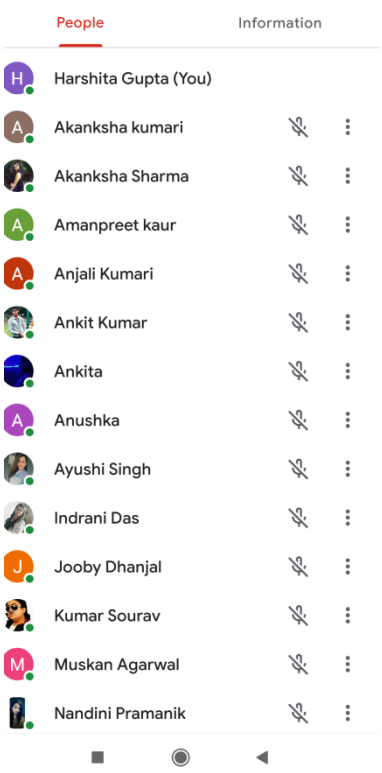

Climate Change –What can be Done about it ?

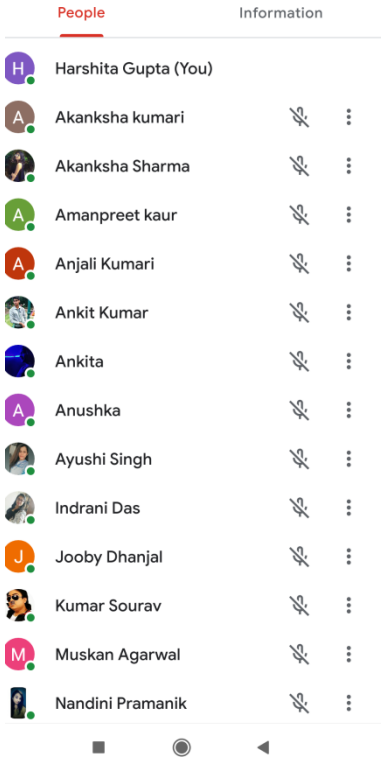

For Semester IV
Section –A and B)
Mode-Google Meet

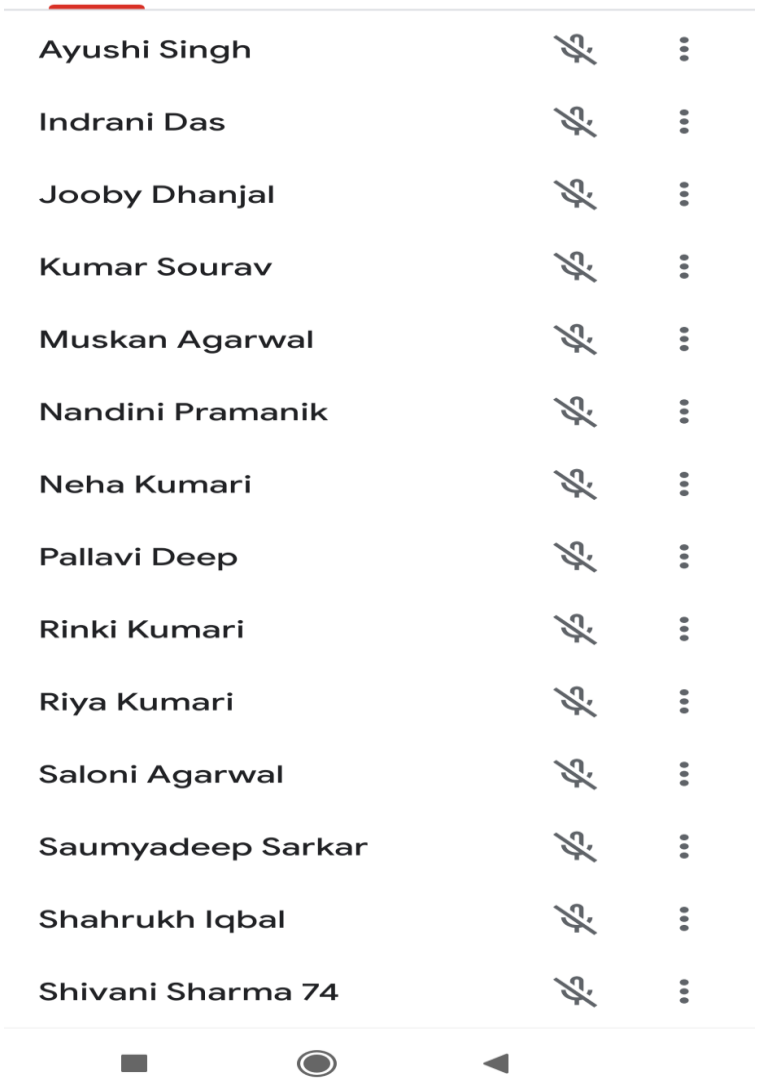

Date : 22/02/2021
